

Dear FCC, Im sure there must be more important things you could be working on besides where I listen for weather & traffic information. It is pitiful that you are now trying to limit what we can hear on XM radio. Radio that I am paying to listen to!!! Let the people decide what they want to hear for once! Your witch-hunt to get Howard Stern off the air should not carry over into the satellite radio arena. If I dont like what XM radio is offering then I (as well as all the other subscribers) will cancel my subscription and XM radio will go away.....but that is "OUR" decison....NOT YOURS!!!!

p.s. The kids across the street are using walkie-talkies without a proper FCC license....why dont you go harass them and leave my XM radio alone!
